"chaos theory" AND ACLM/vehicle

PAT. NO. Title

- 1 6,999,860 Low energy method for changing the inclinations of orbiting satellites using weak stability boundaries and a computer process for implementing same
- 2 6,751,531 Low energy method for changing the inclinations of orbiting satellites using weak stability boundaries and a computer process for implementing same
- 3 6,745,623 Method and system for identifying a tyre of a vehicle
- 4 6,577,930 Low energy method for changing the inclinations of orbiting satellites using weak stability boundaries and a computer process for implementing same
- 5 6,442,482 Procedure for generating operational ballistic capture transfer using a computer implemented process
- 6 6,434,512 Modular data collection and analysis system
- 7 6,341,250 Low energy method for changing the inclinations of orbiting satellites using weak stability boundaries and a computer process for implementing same
- 8 6,317,686 Method of providing travel time
- 9 6,278,946 Procedure for generating operational ballistic capture transfer using computer implemented process
- 10 6,253,124 Low energy method for changing the inclinations of orbiting satellites using weak stability boundaries and a computer process for implementing same
- 11 6,097,997 Low energy method for changing the inclinations of orbiting satellites using weak stability boundaries and a computer process for implementing same
